

Use Case – Cloud RAN Management

- Nuviso discussing partnership with a company that specializes in virtual Base Station VNFs
- Typical deployment involves 100s of BBU VNFs
- Vivace to manage the BBU Pool VNF Life Cycle & day-0 configuration
- Interlude to help in day-1+ configuration
- Maestro to handle Service Orchestration
- When Remote Radio Head moves to Ethernet Fronthaul, Interlude can manage RRH also
